# Effortlessly Analyze and Optimize Processes

Processes can be prone to bottlenecks, deviations, and inefficiencies, but you can't improve what you can't see. Decisions Process Mining provides organizations with a clear, data-driven view of how their processes truly function. With our low-code platform, you can uncover hidden issues, speed decision-making, and optimize operations—with the assurance that manual review of processes can't provide. .

Decisions Process Mining delivers the evidence-based insights you need to drive efficiency throughout your business. From shortening customer service cycle times to accelerating time-to-market for new products and enhancing employee productivity, Decisions empowers you to transform processes at every level.

- **Uncover Hidden Inefficiencies:** Analyze real-time data to reveal bottlenecks, deviations, and inefficiencies that are often overlooked and take action based on facts, not assumptions.
- **Data-Driven Decision Making:** Leverage actual event logs and data from your systems to visualize and understand how processes are truly executed, leading to informed, strategic decisions.
- **Optimize Beyond Automation:** Enhance automation by identifying where automation is most effective to ensure maximum efficiency and ROI.
- **Continuous Improvement:** Adapt and optimize workflows dynamically, making sure that processes stay efficient as business needs evolve.
- **Bridge the Gap Between Planned and Actual Processes:** Conduct conformance checking to ensure your processes are being followed as designed, helping close the gap between theoretical models and real-world execution.

"Using Decisions Process Mining, we found areas of concern that weren't strongly evident beforehand. It's a quick and easy way to gain insights into processes and to uncover dependencies and process blockers." **TYSON HAMBLIN, CONSERVICE**

PROCESS MINING LETS YOU:

- Discover Processes
- Pinpoint Problems
- Oversee Optimization

DECISIONS

TURN REAL-TIME DATA INTO ACTIONABLE INSIGHTS

Decisions Process Mining's exceptional features transform complex process data into intuitive visual insights, enabling continuous monitoring and refinement of your business processes.

- Get real-time visibility into workflow effectiveness with just one click using our instant Insight Analysis Report.

- Identify inefficiencies such as bottlenecks, rework, and compliance issues with powerful tools like the Compliance Checker and Variant Explorer.

- Gain clear visibility into your actual workflows and performance baselines with real-time, interactive process maps and dashboards.

- Optimize processes confidently with tools like the Cost Analyzer and Process Simulator to visualize costs and test potential outcomes before implementing changes.

TAKE CONTROL OF YOUR BUSINESS PROCESSES

Decisions Process Mining gives you the clarity to understand where your processes stand today and how to get them where they need to be. Our experts will help you deploy strategies that increase productivity, reduce costs, and drive growth.

Join other customers who rely on Decisions to uncover inefficiencies, improve infrastructure, and unlock growth.
