

Centralize control over the policies and procedures in your business.

Without centralized control, companies waste resources maintaining policies and procedures in spreadsheets, siloed applications, sticky-notes, and the memory of their people.

Decisions Rules Engine consolidates governance of your business rules in one location for easier maintenance, visibility, security, and agility. Build rules with visual tools — no coding experience required — enhancing your ability to respond to change on the fly.

From simple approval mechanisms to nested rule sets, the Decisions Rules Engine can handle a wide range of complexity, process millions of transactions expeditiously, extend the functionality of your platforms, and automate your decisioning processes.

By consolidating business rules in Decisions, you can centrally control systems, overcome excessive customization, focus on the effectiveness of decisions, and align automation with your business strategy.

ONE PLATFORM TO RULE THEM ALL

Codify Business Logic: *Standardize governance of policies and procedures*

Unify operations and make changes from a single location.

Validate Data: *Verify data is clean, meaningful, and secure*

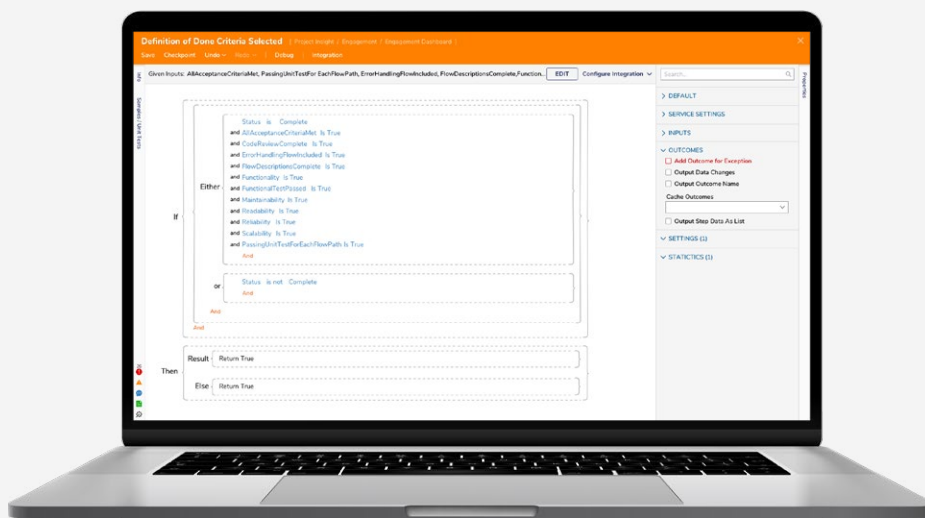

Increase confidence and reduce rework through quality assurance.

Automate Decisions: *Use rules to determine outcomes*

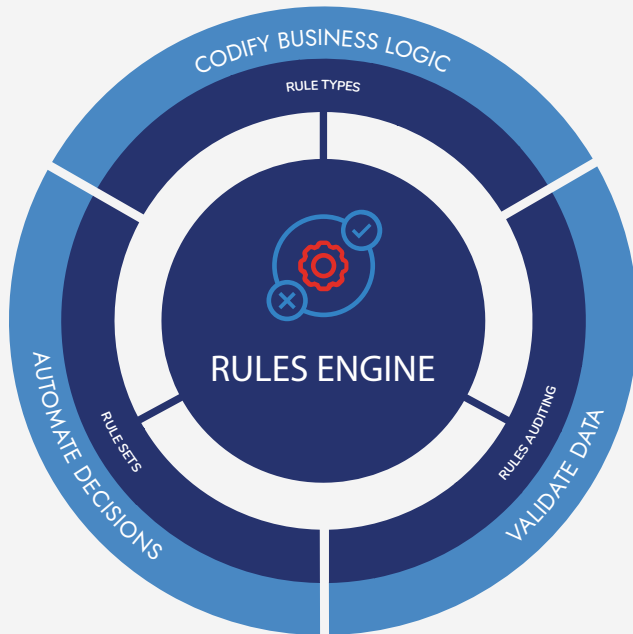

Focus your people on their expertise, not manual work.

THE RULES ENGINE LETS YOU

- Codify Business Logic
- Validate Data
- Automate Decisions

RULES ENGINE FEATURES AND BENEFITS
