

Fortify Your Defense with Decisions' Rules Engine

Fraud remains one of the most significant threats to financial institutions worldwide. The complexity and frequency of fraudulent activities continue to rise, leading to increased operational, financial, and reputational risks. Some fraud prevention solutions lack the ability to create custom fraud logic quickly and without code, making them less agile.

A proactive, automated approach is crucial to protecting financial systems and customer data. Decisions with its powerful rules engine offers a dynamic, scalable solution for real-time fraud detection and prevention, ensuring institutions stay ahead of emerging fraud tactics.

KEY FEATURES

- **Continuous Fraud Detection:** Constantly monitors transactions and behavior to detect suspicious activities as they occur, enabling immediate action.
- **Highly Customizable Rules:** Enables tailoring of fraud detection rules to meet the unique needs and risk profiles of each financial institution.
- **Scalable Operations:** Handles large transaction volumes without compromising fraud detection accuracy, making it ideal for institutions of all sizes.
- **Predictive Fraud Detection:** Integrates machine learning and AI to adapt and predict fraud patterns, further improving detection accuracy.

THE DECISIONS DIFFERENCE

Real-Time, Data-Driven Decisions

Processes large volumes of data in real-time, enabling institutions to respond to fraud instantly and minimize potential damage.

Automated & Scalable Operations

Automates fraud detection, reducing the need for manual intervention and improving efficiency, even in high-volume transaction environments.

Decisions' rules engine provides a scalable, low-code solution for real-time fraud detection, enabling financial institutions to customize rules, monitor transactions, and predict fraud effectively.

Integration with External Data

Seamlessly integrates with third-party fraud detection providers, credit bureaus, and global threat intelligence sources, creating a holistic fraud defense system.

Improved Accuracy & Reduced False Positives

Provides customizable rules and data analysis to reduce the occurrence of false positives, enhancing the customer experience and improving resource allocation within fraud teams.

ADDITIONAL BENEFITS

- **Enhanced Fraud Prevention:** Detects fraudulent activities earlier and more accurately than traditional methods.
- **Operational Efficiency:** Automates fraud detection, reducing the workload on manual processes and improving operational efficiency.
- **Cost Savings:** Reduces financial losses from fraud and minimizes the need for manual intervention.
- **Improved Compliance:** Easily adapts to evolving regulatory requirements, ensuring ongoing compliance with financial industry standards.

FUTURE-PROOFED, INTELLIGENT FRAUD PREVENTION

Decisions' rules engine integrates with AI and machine learning, continuously learning from new fraud patterns to enhance detection capabilities. The system's adaptability ensures that financial institutions can remain resilient as fraud tactics evolve.

PROTECT YOUR FINANCIAL INSTITUTION WITH DECISIONS

Stay ahead of fraud, improve operational efficiency, and provide a seamless, secure experience for your customers. Decisions offers a scalable, adaptable solution that evolves with the needs of your institution.

Keep your organization safe, secure, and shielded from financial loss. Schedule a time with our team to explore the advantages of Decisions for fraud prevention.

ABOUT DECISIONS

Decisions is a powerful, comprehensive low-code process automation platform that empowers businesses to streamline processes, optimize operational efficiencies, ensure regulatory compliance, and enhance customer experiences. Trusted globally across all industries, Decisions merges AI tools, a robust rules engine, workflow management, process mining, interface designers, and integration orchestration to help organizations code less and achieve more.
